

CRM Updates

The CRM module control form layout has had a complete makeover, making it more intuitive and easier to discern the various options.

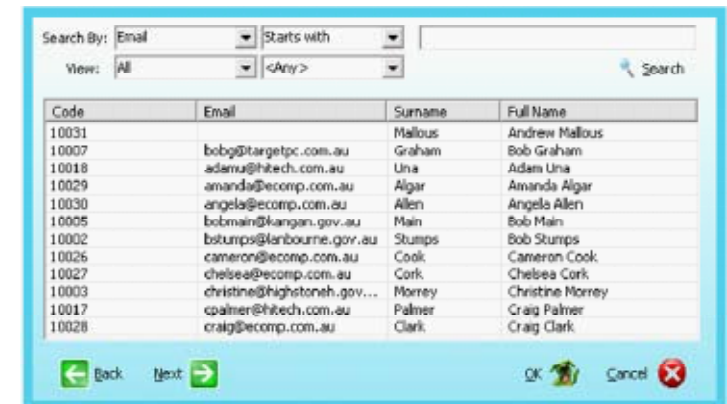

BPM Updates

By popular request, a new notes tab has been added to the BPM rules screen, to enable you to fully document each rule.

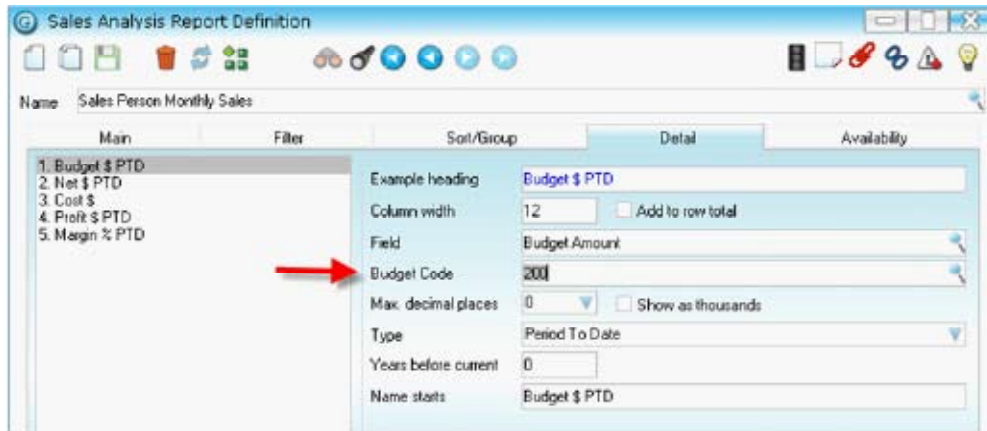

File from Outlook to Greentree

This function has undergone some enhancements to provide more options and intelligent selections when filing.

SCM Analytics

SCM analytics has been extended to draw on all of the budgets provided within inventory budgets. This includes item, salesperson, customer and other combinations, allowing reports to be defined and providing comparisons of actual versus budget.

FREE Functions

Many new CRM functions are also now available within FREE.
